Compression testing machine

Description:

- Compression testing machine, 2000 KN complete with digital display unit.
- it works to it's full function through digital display LCD (Working - test at cube and cylinder – stress – automatic seperation)
- Running on (220 volt – 50hp – 1ph)
- The machine local industry – drive unit imported components

Machine Advantages:

- Work fully automatic through LCD display unit. when touch test ward on display. The machine works automatic until cube fail. Then back to display where the readings keeping on display until start a new test.
- The guarantee is two years against manufacturing defects
- The machine work with two speed for contact and for test

ARAB TECHNOLOGY

PAGE 2

50KN Capacity Automatic CBR

Description:

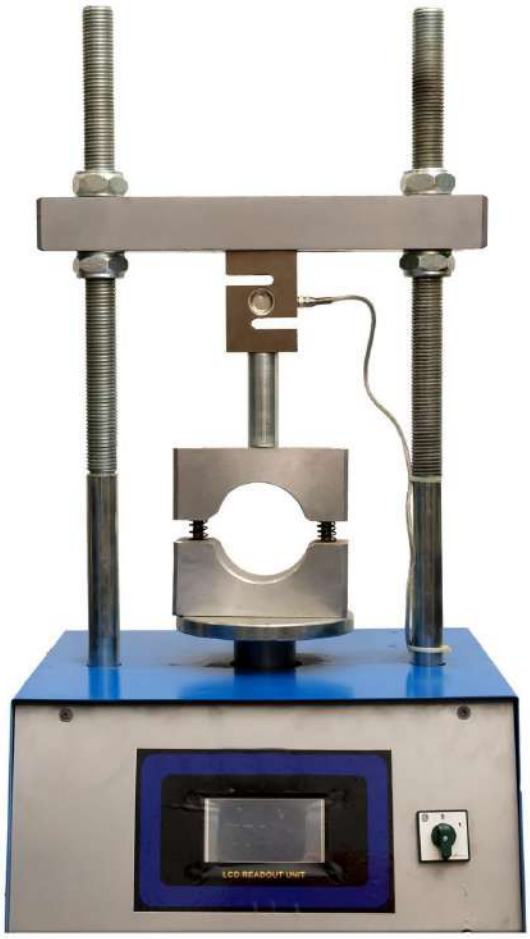

50KN CBR Compresion machine complete with load cell.

-The device complete with electronic measurement to measure the penetration 0.01mm accuracy

- all results appear on the display (penetration and load)

Then all the test automatically.

- The results get at 0.1 , 0.2 inches.
- The motor and gear box Italian manufacture
- The machine device work with two speed for contact and for test

PAGE 3

30KN Capacity Automatic Marshall

Description:

-30KN Marshall compression machine complete with load cell.

- The machine complete with electronic measurement to measure the flow
- The device supplied with digital display unit lcd. Touching work.
- Digital operating system – load reading (kg) – penetration reading with 0.01mm accuracy. And the test speed 50.8mm/min
- The device work automatic till the results appear on the display
- The components of device Italian and korean parts and local collection

PAGE 4

Los angeles Abrasion testing machine

Description:

-Abrasion testing machine complete with German motor work as: 220v,50hp, 1ph OR 380v, 50hp, 3ph

- the number of turns measured by digital counter. And can control in stop machine -31-33 turns in minute is the speed of the machine with load.

-the machine include 12 iron balls the weight net 390 ~ 445 grams

-the machine weight not less than 400kg

- all raw materials used in manufacturing very strong and against abrasion and corrosion

-the transform motion cylinder manufactured from erosion iron resistance

- the thickness at rotation drum 12.1mm

-the machine has a safety propaty when power cut prevent the machine to work suddenly

- imported parts and local collection

ARAB TECHNOLOGY

PAGE 5

Electric drying oven

Description:

-120 liters capacity

- The internal room from stainless steel

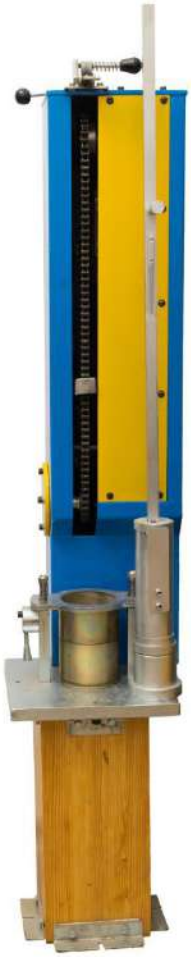

- thermal insulated

- complet with digital thermometer to control and reading of temp.

- thermometer Korean made

-the oven contains stirring fan to regular heat distribution

- imported parts local collection

PAGE 6

Marshall automatic compactor

Description:

-the apparatus use to automatically compact the sample

- we can set the number of blows through digital display unit

-the apparatus doesn't make noise

- the compator is supplied complete with a wooden pedestal

- the compactor manaufactured from a good materials

- the compactor is free from defects comparing the similar apparatus

- the current is 220v,50hp,1ph

- the apparatus supplied with a 4500 gram modified rammer.

PAGE 7

3000 grams electric centrifuge extractor

Description:

-the centrifuge extractor used for determination the percentage of bitumen in mituminous mixtures.

- the current 220v,50hp, 1ph, by ac drive (inverter)

-digital display and speed control, up to 3600 r.p.m

- stable and silent all over the test

- can not opening during rotation

- the centrifuge extractor has a safety prevent the fire during test

PAGE 8

40 liters digital Waterbath

Description:

-Waterbath for marshall moulds

- supply with thermostate and digital display, Korean manufacture

-the heater is Italian made

- the internal chamber and cover made of stainless steel

-capacity 40 liters

- 220v,50hp,1ph

PAGE 9

vicat test set

Description:

-The apparatus consists of metal frame with sliding rod on a graduated scale

- we put the mold on the base of apparatus

- supplied with initial and final needles

- local made.

PAGE 10

Automatic Proctor digital compactor

Description:

-Automatic proctor digital compactor for 4,6 inches samples

- the compactor automatic and electric machine supply with lcd display

- can to change the test from standard to modified from touch screen

-included the test rammer standard and modified

-include noise reduction cabinet to protect operator

- the base at machine rotates during test

- easy use and maintenance

- 220v, 50hp, 1ph

PAGE 11

Universal extruder

Description:

-Universal extruder for 4,6” specimen

- for 4,6 inches specimen diameter

- 5 ton capacity

- local

PAGE 12

Sand density cone

Description:

- Used to measure the soil density at site.
- The cone 6'' diameter
- Supplied with plastic jar 5 liters capacity
- local
